Christopher Lu

FULL STACK SOFTWARE ENGINEER

New York, NY | christopherlu.dev | github.com/christopher-lu | linkedin.com/in/christopher-lu19 | lu.christopher.m@gmail.com

PROFESSIONAL SUMMARY

Full Stack Software Engineer who turns user and system problems into maintainable software and validates results in production environments. Experienced building and deploying mobile, web, backend, and cloud-native products with TypeScript, React, React Native, Next.js, NestJS, PostgreSQL, Docker, Kubernetes, and Prometheus. Proven record improving performance, billing accuracy, reliability, accessibility, and customer experience.

SKILLS

Languages	TypeScript | JavaScript | SQL
Frontend	React | Next.js | React Native | Tailwind CSS
Backend	NestJS | Node.js | Express | REST APIs | GraphQL
Data	PostgreSQL | Prisma ORM | MongoDB
Cloud & Observability	Docker | Kubernetes | AWS | Prometheus | Grafana
Testing & Quality	Jest | React Testing Library | Vitest | Swagger/OpenAPI | End-to-End Testing
Practices	System Design | API Design | Debugging | Git | GitHub | Jira | Agile/Scrum

PROFESSIONAL EXPERIENCE

Did I Do That (DIDT) (Open Source) | Full Stack Software Engineer **Present**

- Advanced DIDT to an Alpha-stage application with a hosted backend, an Alpha mobile build, and a deployed web client, keeping habit, schedule, tracking, and history behavior consistent across platforms.
- Engineered 9 built-in themes plus system default: Light and Dark standard themes, High Contrast accessibility theme, and 6 enhanced themes (OLED Black, Sky, Paper, Forest, Midnight Blue, and Sepia), expanding customization across visibility and accessibility needs.
- Built 2 tracking modes, Boolean completion and quantitative progress, with configurable increments, corrections, and overachievement so users can track both yes/no and numeric goals.
- Protected user data with a 30-day recovery workflow for deleted habits and categories, preserving history while allowing safe restoration after mistakes.
- Organized complex routines with 5 priority levels plus Favorite and Pin controls, backed by server-side sorting and filtering for faster access to important habits.
- Unified time-sensitive behavior with backend-owned timezone and schedule rules so Today and History remain consistent when users travel or switch devices.
- Deployed DIDT's NestJS backend to Railway, supporting an Alpha-stage application across mobile and web clients through a shared PostgreSQL-backed API and centralized business logic.

Tern Systems | Full Stack Software Engineer **2024-2026**

- Automated ZIP-code tax calculations through a third-party API, improving billing accuracy by 60%+ and reducing manual calculation errors by 40%.
- Optimized Next.js routing, reducing unnecessary page reloads by 33% and application load times by 25%.
- Standardized reusable React components and shared TypeScript models, improving consistency and maintainability across customer-facing features.

OSLabs | Software Engineer - KlusterBud **2023-2026**

- Led full-stack development of KlusterBud, an open-source Kubernetes observability platform that turns infrastructure metrics into actionable dashboards for developers and SREs.
- Improved dashboard responsiveness by approximately 20% by streamlining Node.js/Express metrics APIs and Prometheus/PromQL aggregation.
- Designed monitoring workflows for CPU, network, pod runtime, and cluster health, helping users narrow infrastructure issues without relying on raw command-line output.

Loadsmart | Customer Support Analyst II **2022-2023**

- Resolved 95%+ of enterprise SaaS support requests within 1 hour while translating reproducible customer issues into Product and Engineering feedback.
- Reduced onboarding time by approximately 60% through technical training, internal enablement materials, and customer-facing documentation.

Apple | Specialist (Product, Business, & Tier 1 Voice/Chat Support) **2018-2022**

- Guided consumer and business customers through technical and product workflows, contributing to an 85% customer retention rate.
- Trained customers and teammates to 80%+ product proficiency and helped increase customer satisfaction by 5% through coaching and workflow improvements.

TECHNICAL PROJECT

christopherlu.dev | Personal Engineering Portfolio

- Deployed a production Next.js portfolio with reusable components, centralized content, responsive design, dark mode, SEO-friendly structure, and Open Graph metadata.
- Achieved Lighthouse scores of 94 Performance, 97 Accessibility, 100 Best Practices, and 100 SEO through production optimization and accessibility-focused design.

EDUCATION

Stony Brook University - Biology
