

Christopher Lu

Software Engineer

React • Next.js • TypeScript • Node.js • Kubernetes

New York, NY | christopherlu.dev | lu.christopher.m@gmail.com | github.com/christopher-lu | www.linkedin.com/in/christopher-lu19/

PROFESSIONAL SUMMARY

Software Engineer with experience building scalable web applications, cloud-native developer tools, and customer-facing software using React, Next.js, TypeScript, and Node.js. Proven track record of improving application performance, automating business workflows, and developing maintainable solutions that enhance developer productivity and user experience.

TECHNICAL SKILLS

Languages: TypeScript • JavaScript (ES6+) • SQL

Frontend: React • Next.js • Redux • HTML5 • CSS3 • Tailwind CSS

Backend: Node.js • Express.js • REST APIs • GraphQL

Cloud & DevOps: Kubernetes • Docker • AWS (EC2, S3)

Observability: Prometheus • Grafana

Databases: PostgreSQL • MongoDB

Testing & Tools: Jest • React Testing Library • Git • GitHub • Jira • Agile/Scrum

PROFESSIONAL EXPERIENCE

Tern Systems | Full Stack Software Engineer | 2024–Present

- Improved billing accuracy by 60%+ while reducing manual tax calculation errors by 40% by integrating third-party tax APIs and automating ZIP code-based tax calculations.
- Reduced unnecessary page reloads by 33% and improved application load times by 25% by optimizing client-side routing with Next.js.
- Accelerated feature delivery by standardizing reusable React components and shared TypeScript models, improving consistency and long-term maintainability.
- Delivered customer-facing features through Agile collaboration with cross-functional stakeholders while maintaining scalable, high-quality code.

OSLabs | Software Engineer | 2023–Present

- Engineered KlusterBud, an open-source Kubernetes observability platform, using React, TypeScript, Node.js, Express, Prometheus, and Grafana.
- Enabled faster identification of pod health issues and CPU anomalies by developing PromQL-powered dashboards.
- Improved dashboard responsiveness by approximately 20% by designing scalable backend APIs that aggregate Kubernetes metrics.
- Reduced duplicated logic and simplified future development by building reusable React Hooks and modular component architecture.

OpenDock | Customer Support Analyst II | 2022–2023

- Resolved complex software issues by reproducing defects and partnering with engineering teams to deliver product improvements.
- Improved customer satisfaction through technical troubleshooting, workflow optimization, and clear communication.
- Increased product reliability by documenting recurring issues and collaborating with developers to prioritize fixes.

Apple | Specialist | 2018–2022

- Delivered expert technical consultations in a high-volume retail environment.
- Diagnosed hardware and software issues while educating customers on Apple products and best practices.

EDUCATION

Stony Brook University - Biology
